ah! Insect Screen

Insect Screen

introduction

The **insect screen** has been developed to be integrated into the outer rail of the system (birail, trirail or multirail). It will be supplied with a maximum net height of 3400mm and opening capacity up to 700mm wide for ahl60 and 500mm for ahl38. When collected, the insect screen is completely embedded in the fixed frame, out of the view of the user. The water and dust repellent black polyester mesh combined with the tension wires ensure stability, durability and resistance to weathering agents. This new product aims to standardize and optimize insect screen applications in the **ahl60** system and **ahl38** system. In addition to being more versatile in terms of typologies and operation, the new system will significantly reduce installation time on site

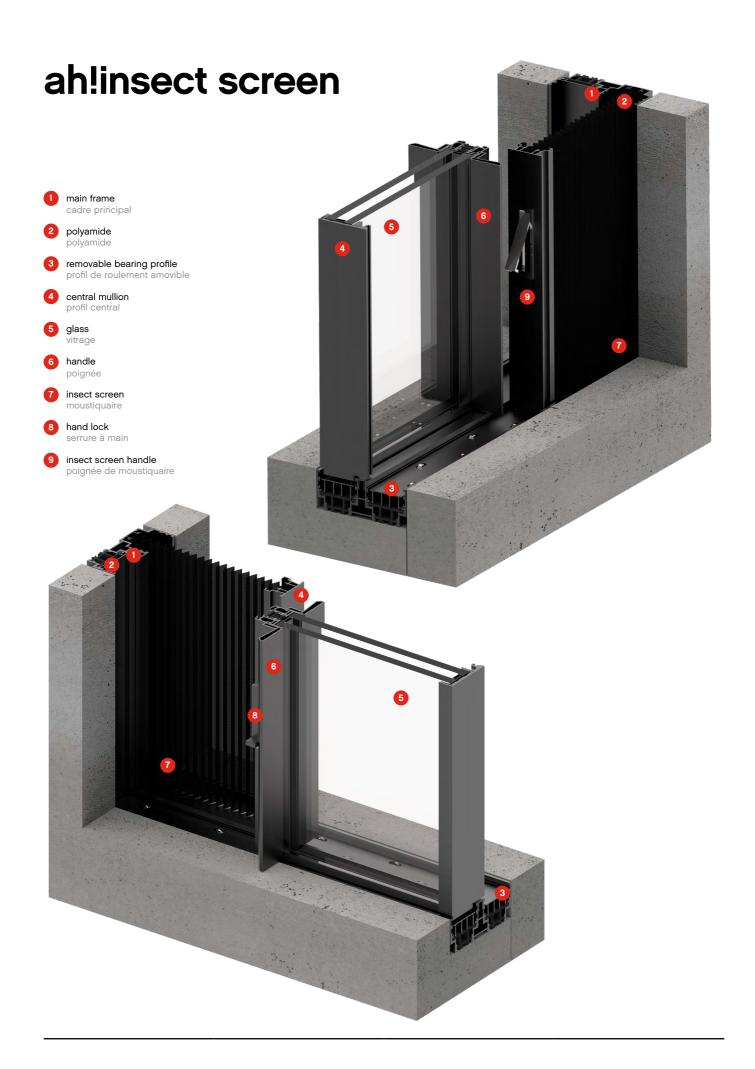

La moustiquaire a été développée pour être intégrée dans le rail extérieur du système (birail, trirail ou multirail). Il sera fourni avec une hauteur maximale nette de 3400 mm et de 700 mm de large pour la capacité d'ouverture pour l'ah!60 et 500 mm pour l'ah!38. Quand collectés, la moustiquaire est complètement encastrée dans le cadre fixe, de la vue de l'utilisateur. La maille en polyester noir hydrofuge et anti-poussière combiné avec les fils de tension assurent la stabilité, la durabilité et la résistance aux agents atmosphériques. Ce nouveau produit vise à standardiser et optimiser applications de moustiquaires dans les systèmes ah!60 et ah!38. En plusd'être plus polyvalent en termes de typologies et de fonctionnement, le nouveau système réduira considérablement le temps d'installation sur site.
